BIRTH PREPARATION INFORMATION

The team at the Women, Mother and Children Unit at Hôpitaux Robert Schuman are offering you a range of on-site and online workshops to help you actively prepare for the birth of your baby.

FACE-TO-FACE

BIRTH PREPARATION CYCLE

This 2-session cycle includes practical information, positioning and breathing exercises and relaxation time.

The aim of this cycle is to:

- Inform you about your pregnancy,
- Prepare you for childbirth,
- Prepare you for the first few days with your baby.

This cycle is available from the 28th week of pregnancy.

NESTING WORKSHOP OR TAKING ACTION FOR THE HEALTH OF FUTURE GENERATIONS

The first 1000 days (from conception to the child's 2nd birthday) are considered to be a crucial stage in a baby's development. Ensuring both your health and their health during this sensitive period is everyone's business. This workshop will help you identify indoor pollutants and give you the means to take action to create a healthy environment for you and your baby.

PHYSICAL ACTIVITY DURING PREGNANCY

Our team of midwives will work with you to prepare your body for childbirth, help you sleep soundly and reduce stress.

Remember to bring suitable clothing (trainers, stretchy clothing), water and a snack.

BECOMING AND BEING PARENTS

Organised by the Janusz Korczak School for Parents. Counsellors talk about your commitment as parents, and the role of fathers and mothers in raising children. The bond that the father and mother forge with their child marks the beginning of the child's upbringing right through to adulthood.

ONLINE (LIVE SESSIONS)

BREAST-FEEDING

This session is dedicated to breastfeeding. A lactation consultant will give you information on physiology and answer any questions you may have.

PREPARING FOR A CAESAREAN SECTION

This workshop will help you prepare for the possibility of a caesarean section. The different stages of a caesarean section are covered (the procedure and support in the operating theatre, the father's role during the operation, welcoming your baby, first breastfeeding, postoperative follow-up, etc.).

AFTER BIRTH

The post-natal or fourth trimester of pregnancy is the period covering the 3 months following the birth.

Various topics are covered: newborn sleep, preventing cot death, co-sleeping, baby crying, emotional security, colic, dummies, babywearing, etc
